

i believe they can FLY!

Technology is such a big part of our students' world today. My students have truly benefited from daily access to multiple forms of technology. Their creativity, productivity and innovation and collaboration have soared as a result of this addition to our classroom.

SYNOPSIS

I love teaching my amazing students! Their imaginations know no limits and they crave information and use their creativity to innovate and grow in their learning. These students make full use of any technology made available to them. It had been so exciting to see them seek information in new ways and have access to more resources, apps and tools to create presentations, stories and projects. I believe this has allowed them to make a real connection to their world. Students have focused on 4 big ideas throughout the year that are connected to their learning. This allows them to think bigger, make global connections and allows them to focus more deeply on concepts.

Our Big Ideas

1st Nine Weeks: How do ideas impact the world and how does the world shape ideas and perceptions?

2nd Nine Weeks: When do conflicts lead to change and why is conflict often need for change to occur?

3rd Nine Weeks: How does society promote or deny our opportunities?

4th Nine Weeks: What responsibility do I have to the world and how can I make a difference in the world?

i believe they can connect...

A previous grant allowed my classes to connect to the local community by creating a book of their stories for local Children's hospitals. This year we will do a global Philanthropy project – Shoes for Orphan Soles. I am excited for the kids to be able to use technology to connect to their community and the world.

With more ipads in our classroom,
i believe my students are leaving their
mark, writing their verses and flying to
new heights!
